Dimeo Construction Company completes Daniel Hand High School in Madison, CT

Madison, CT – Dimeo recently completed the Daniel Hand High School in Madison, CT. This project featured Dimeo as construction manager and was designed by Jeter Cook & Jepson Architects.

The new, \$32.6 million, 207,000 sf high school was designed to fit on an existing site between the athletic fields and adjoining wetlands area. The extremely constricted site supports an efficient, compact facility for 1,250 students. The school consists of 2 separate buildings connected by an enclosed student commons bridge. The academic building offers 152,740 sf of modern academic space including classrooms, 12 science labs, administrative and core space, a 10,800 sf library/media center, a 14,300 sf gymnasium with regulation size basketball court, spaces for music, band, and art, and a 17,160 sf (400 student capacity) multi-purpose cafeteria. The facility was fully wired for state-of-the-art access and use with a strong emphasis on technology throughout. The facility superstructure is a structural steel frame and is clad in brick masonry with pre-cast accents. Additionally, the site features a bus drop off area between the 2 buildings, separating student/staff parking from parent/visitor drop off areas.

Dimeo Construction Company is a New England-based firm with offices in Providence, RI, New Haven, CT, and Westwood, MA. Founded in 1930, Dimeo has provided over 70 years of construction management, general contracting, and design/build services to a broad range of clients including educational, healthcare, R&D, corporate, retail, and manufacturing industries. Additional information about Dimeo can be found at www.dimeo.com.
